Comments from Our Graders About Homework Assignment 1

1. Most students forgot to handle braces '(' and ')' for "Infix to Prefix" or from "Postfix to Infix".
   -- We have explained them in their individual assignments.

2. For Question 2.4.1, most students passed the Non-terminals to the match method which accepts terminals only. This means students have followed a mechanical approach for dealing with the production rule, which doesn't satisfy to all permutations of grammar.
