Due October 3rd, 2012

-----------------

Read Chapter 4
Suggested as always to go through review questions (nothing to be handed in).

-----------------

Solve the following problems in the book:
4.1, 4.2, 4.4, 4.5, 4.9, 4.12 (2 points).

Note: 4.9(b) .. ‘Yes’, while a smart approach to getting around solving this problem, is not a valid answer ☺

Due at the next class as a hard copy to be handed in.

- Handwritten or typed is fine
- Be precise with your answers (we are not interested in reading lengthy explanations ☺)
