Intro to python

Arrow Pattern

Write a program that prompts the user for a number of columns, and them prints the pattern as seen below.

You program should keep looping asking for a value, and printing the pattern, until the user enters "done".

```
How many columns? 5
*
 *
 *
 *
 ***

>>> =====================
>>> How many columns? 2
*
 *
***

>>> =====================
>>> How many columns? 7
*
 *
 *
 ***
