In-Class Assignment - September 26, 2013

1. Write a function that takes a percentage grade (0-100) as an argument and returns the letter grade (A, B, etc.) For example, if your function was called get_letter_grade, a statement like get_letter_grade(75) would return ‘C’. Write a program that uses your function.

2. Write a program that finds the largest of three numbers. Can you think of a way to write this program using functions?
