Final Project:
Choose one of the three projects:

A. Web site. Create a web site with a minimum of 12 pages. The subject of your web site must have a single unifying theme. For example, you may want to create a site on your favorite actor, TV show, musical group or travel destination. Or perhaps you may wish to promote (or protest against) an issue, i.e. Homelessness in New York, vegetarianism, animal testing, etc. The majority of the text in your site must be written by you.

This web site is required to have the following elements:

- Flash - at least one page of your site must be created entirely in Flash. (you may want to make this your "splash" page.)
- Form - at least one form fully functioning form in which a user can respond.
- Video - you must create an original video 15-30 seconds long. It may be longer than 30 seconds but it must be at least 15. Edit this video in Adobe Premiere and upload it to your web site. It must be available both QuickTime and Real.
- Links - you must have at least 6 links to related web sites.
- Images - at least 12 GIFS/JPGS dispersed throughout the site.

Upload the site to your web page AND turn it in on your zip disc.

B. Flash site Create a web site in Flash with a minimum of 6 pages. The subject of your web site must have a single unifying theme. For example, you may want to create a site on your favorite actor, TV show, musical group or travel destination. Or perhaps you may wish to promote (or protest against) an issue, i.e. Homelessness in New York, vegetarianism, animal testing, etc.
This flash site is required to have the following elements:

- Form - at least one form fully functioning form in which a user can respond. The form must be done in Flash.

- Video - you must create an original video 45 seconds to one minute long. It may be longer than one minute but it must be at least 45. Edit this video in Adobe Premiere and upload it to your web site. It must be available both QuickTime and Real. (you will not be able to embed your QuickTime movie & Real Video into your Flash project. You will have to create a separate HTML page for this)

- Sound – you must use at least two sound clips of any length.

- Buttons – you must have at least one button in your project.

- Links - you must have at least 3 links to related web sites.

- Images - at least 6 photographs dispersed throughout the site.

C. Music Video - Create a 3-minute music video on your favorite singer/music group and create a 3 page web site around it. You must shoot the video yourself with a video camera. Edit the video in Adobe Premiere and Adobe After Effects.

This project is required to have the following elements:

- The video must be available on your web site in both QuickTime and Real.

- The web site must have one page created in Flash. (You may want to make this your "splash" page.

- Form - at least one form fully functioning form in which a user can respond. (the form may be done in Flash or regular HTML)

The project is worth 100 points and will be graded on the following criteria

Ability to follow directions (33 pts)
• Has the project been planned well (as opposed to being put together at the last minute)?
• Has the student turned the assignment in on time?
• Has the student included all the required elements for the assignment?

Creativity (33 pts)
• Has the student taken time and effort to create a well-designed project?
• Is the text on the web site original and interesting?
• Does this web site provide useful information?

Functionality? (33 pts)
• Does the web site appear in both Netscape and Internet Explorer?
• Does the form work?
• Does the Flash work?
• Are there any broken links in the project?
• Does the video play with in Netscape/Internet Explorer?
• Are there dropped frames in the video?
