The field of wireless network technologies is extremely dynamic. In the past few years, cellular systems have transformed the way business is done, with wireless communication transitioning from a luxury to an essential tool. Companies are finding that they can leverage wireless to develop tools that will directly differentiate themselves in the marketplace.

The Morgan Stanley Remote Computing team is in charge of developing and maintaining these wireless and mobility solutions for the Firm globally. Learn how the core Remote Computing team leverages technologies such as 2.5, 3 and 3.5G wireless networks, IMS, SIP and VOIP over 5000 laptops, 12000 BlackBerrys and 20000 cell phones to allow employees to work wherever, and whenever, they want.

INFORMATION TECHNOLOGY
