

Homework 6  
Operating Systems, V22.0202  
Fall 2007, Professor Yap

Due: Thu Nov 29, 2007.

## Questions

All but the last question is to be answered by individual students. The last question is to be done as a team. Please put your team report into the CVS repository under your TEAMCODE.

1. Question 6.9, p.233.
2. Question 6.10, p.233.
3. Question 6.11, p.233.
4. Question 6.5, p.233.
5. Question 8.3, p.310.
6. Question 8.9, p.311.
7. Question 8.16, p.312.
8. Please download from our CVS repository the module `class/os/2007/stm/stm2` which contains the code for a team project from a previous class. There are actually three programs there (sos-sequential, sos-multi and sos-optimized). You are to study these code and write a report of its implementation. This will be useful for your next programming assignment.
