

Multicore Processors: Architecture & Programming Project Presentations

The presentation for each project:

- **15 minutes** only (including questions - so **plan 10 minutes presentation + 5 minutes questions**): If the group has more than 1 person, the group has to decide whether one person will present the whole thing, or will divide slides among group members. However, questions asked during presentation will be directed to the whole group not the presenter(s) only.
- **7 slides only**: (Figures are better than list of bullets whenever possible)
 - Title Slide (including project title and name of all members)
 - 1 slide problem definition
 - 1 slide survey
 - 1 slide experimental setup
 - 2 slides results and analysis
 - 1 slide conclusions

Good Luck Folks!
