Letter of Recommendation

I am pleased to write this letter of support for Dr Haoran Yi

Pattern Recognition Letters (PRL) is the official journal of the International Association of Pattern Recognition, with aims at rapid publication of concise articles representing current progresses in areas covered by IAPR's technical interests. In those fields, the papers may emphasize theory, methodology, empirical studies or applications. PRL is a refereed journal, and in the review process we maintain highest standards on an article's originality, quality and clarity. According to Journal Citation Reports published by Thomson Scientific, the impact factor of this journal is 1.138 in 2005.

In my capacity as Editor-in-Chief, it is a pleasure for me to state that Dr Yi has served as referee in the reviewing process of the journal. We do consider both the ability and the willingness as a major contribution to the scientific community. Our articles reach a large audience that consists of researchers and practitioners in Pattern Recognition, Computer Science, Electrical and Electronic Engineering, Mathematics and Statisticians, and many areas of science and engineering where automatic pattern recognition is applicable. Reviewer services are indispensable in making our articles valuable references in the community.

I hope that Dr Yi can continue to serve the scientific community in these and other new ways.

Sincerely,

Tin Kam Ho, Editor-in-Chief,  
Gary Anderton, Journal Manager  
Pattern Recognition Letters
