Query optimization, scientific  
databases, data, visualization and  
database user interfaces

Frequency: Published 8 issues per annum in March, April, May, June, July, September, November and December

### Aims and Scope

Information systems are the software and hardware systems that support data-intensive applications. The journal *Information Systems* publishes articles concerning the design and implementation of languages, data models, process models, algorithms, software and hardware for information systems.

Subject areas include data management issues as presented in the principal international database conferences (e.g. ACM SIGMOD, ACM PODS, VLDB, ICDE and ICIT/EDBT) as well as data-related issues from the fields of data mining, information retrieval, internet and cloud data management, web semantics, visual and audio information systems, scientific computing, and organisational behaviour. Implementation papers having to do with massively parallel data management, fault tolerance in practice, and special purpose hardware for data-intensive systems are also welcome.

All papers should motivate the problems they address with compelling examples from real or potential applications. Systems papers must be serious about experimentation either on real systems or simulations based on traces from real systems. Papers from industrial organisations are welcome.

Theoretical papers should have a clear motivation from applications. They should either break significant new ground or unify and extend existing algorithms. Such papers should clearly state which ideas have potentially wide applicability.

In addition to publishing submitted articles, the Editors-in-Chief will invite retrospective articles that describe significant projects by the principal architects of those projects. Authors of such articles should write in the first person, tracing the social as well as technical history of their projects, describing the evolution of ideas, mistakes made, and reality tests. Technical results should be explained in a uniform notation with the emphasis on clarity and on ideas that may have applications outside of the environment of that research. Particularly complex details may be summarised with references to previously published papers.

We will make every effort to allow authors the right to republish papers appearing in *Information Systems* in their own books and monographs.

### U.S. Editor

## GUIDE FOR AUTHORS

### Types of Contributions

The Editors will be pleased to receive contributions from all parts of the world. The types of articles published by *Information Systems* are as follows: *Regular Articles*: As its name implies, this is the normal medium of publication. Although there is no fixed length, concise presentation is strongly favored. *Reviews*: On occasion, reviews by invitation by the Editors will be given.

### Submission of Articles

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis); that it is not under consideration for publication elsewhere; that its publication is approved by all Authors and tacitly and explicitly by the responsible authorities where the work was carried out; and that, if accepted, it will not be published elsewhere in the same form, in English, or in any other language, without the written consent of the Publisher.

Upon acceptance of an article, Authors will be asked to transfer copyright. This transfer will ensure the widest possible dissemination of information. A letter will be sent to the corresponding Author confirming receipt of the manuscript. A form facilitating transfer of copyright will be provided.

If excerpts from other copyrighted works are included, the Author must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by Authors in these cases: contact Elsevier Rights Department, Oxford, UK: phone (+44) 1865 843830, fax (+44) 1865 853333, e-mail: permissions@elsevier.com. Requests may be completed online via the Elsevier homepage (<http://www.elsevier.com/locate/permissions>).

For a full and complete Guide for Authors, please go to: <http://www.elsevier.com/journals/information-systems/0306-4379/guide-for-authors>

### Electronic Submissions only

All manuscripts and any supplementary material should be submitted via the journal's online submission and peer review system at <http://ees.elsevier.com/is>. Please follow the instructions given on this site. For the complete Guide for Authors, please go to <http://www.elsevier.com/locate/is>.

### Author enquiries

For enquiries relating to the submission of articles (including electronic submission) please visit this journal's homepage at <http://www.elsevier.com/locate/is>. For detailed instructions on the preparation of electronic artwork, please visit <http://www.elsevier.com/artworkinstructions>. Contact details for questions arising after acceptance of an article, especially those relating to proofs, will be provided by the publisher. You can track accepted articles at <http://www.elsevier.com/trackarticle>. You can also check our Author FAQs at <http://www.elsevier.com/authorFAQ> and/or contact Customer Support via <http://support.elsevier.com>.

# INFORMATION SYSTEMS

## DATABASE: CREATION, MANAGEMENT AND UTILIZATION

**Author benefits:** (1) e-offprint, (2) 30% discount on all Elsevier books, and (3) Information Systems has no page charges.

### Language (Usage and Editing services)

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop <http://webshop.elsevier.com/languageediting/> or visit our customer support site <http://support.elsevier.com> for more information.

### Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>

**Publication information:** *Information Systems* (ISSN 0306-4379) For 2013, volume 38 (8 issues) are scheduled for publication. Subscription prices are available upon request from the Publisher or from the Elsevier Customer Service Department nearest you or from this journal's website (<http://www.elsevier.com/locate/is>). Further information is available on this journal and other Elsevier products through Elsevier's website (<http://www.elsevier.com>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

**Advertising information:** If you are interested in advertising or other commercial opportunities please e-mail [Commercialsales@elsevier.com](mailto:Commercialsales@elsevier.com) and your enquiry will be passed to the correct person who will respond to you within 48 hours.

**Orders, claims, and journal enquiries:** please contact the Elsevier Customer Service Department nearest you:
