**Semester of Registration** Fall

**Year of Registration** 2015

**Registration Appointment** Wed 4/22

**Expected Graduation Month** May

**Expected Graduation Year** 2017

**Goals** My academic goals for this semester are to take Algorithms, and classes that I find interesting that will fulfill some of my Historical Foundations requirements. Before I graduate, I hope to continue taking more computer science classes, trying to dabble in Tisch Animation, and take more artistic classes.

**Interests and Concentration** My area of concentration is Computer Science and Art. I have yet to write my IAPC. I do not intend to declare a minor.

**Progress and Change** This past semester, I have taken photography of architecture in Florence to contribute to the art part of my concentration. As for how my interests, goals, and plans have changed - I am taking Discrete Math and Introduction to Editing over the summer, and I think in the future I want to incorporate more editing, 3D modelling (art), and animation and film and tv aspects into my concentration. Also, looking at classes, I really find myself drawn to discourse about warfare.
