

Acronym Meeting

8/5/2019

Last week tasks

1. Build a big acronym/expansions dataset

- Parallelized the processing of wikipedia articles to get acronyms and expansion

TODO

1. Run experiments over CSWikipedia

- Fix memory leak in n-grams context vector
- Still left: n-grams context vector and locality

2. Demo

1. Server online
2. State-of-the-art parser

On Hold

1. Implement related work disambiguation approach from Acronyms: identification, expansion and disambiguation
2. Prepare datasets MSH and ScienceWISE to run locality
3. Run new approaches on MSH and ScienceWISE
