

Test.terraling.com Test.Terraling.com. Version: 2.0.0-5

**Signed in as Site administrator.** (just discovered signing as an expert (man) allows a supported edited page: et least I can

- The supported edit values has not been implemented yet.
- I cannot yet edit properties, change names etc.

Browsing and searching:

- On the Masthead: Going to group1 does not work.

Works: [Search](#), [Languages](#),

**Listing languages: all .**

*This is important Please do throughout*

Do not yet work: Group, Properties, Contributors

- Typing on the main page yields a choice Group 1 or Group 2.
  - Clicking on a language works well.
    - i. NO SUPPORTED EDIT VALUES YET
  - ,Back arrow: back to languages page (woks)

Example: Language → Afrikaans → Property O3\_VO→

- **Description** shows property definition. A few font issues (\E should be E),  
⇒ Under Values: **\*\*Please list all languages with the same value for O3V-Yes (not just the languages under A and \*)\*\***

## Property : 03\_VO

### Quick Analysis

Add Properties to compare with 03\_VO values

Looking for a specific Property?

Selected Lings ( Clean )

Q Cross Properties

Q Implication Antecedent

Q Implication Consequent

### Values

A B C D E F G H I J K L M N O P Q R S T U V W Y Z \*

Language	Value	Creator
=Hoan	Yes	
Armenian (Western)	Yes	

A B C D E F G H I J K L M N O P Q R S T U V W Y Z \*

© 2013 terraling.com, Version: 2.0.0-5

10 Washington Place, New York, NY 10003 . support @ terraling.com . All Rights Reserved

### Quick Analysis

- **Add properties to compare with 03 VO values**

*Looking for a Specific property: yields a max of 5 options.*

*\*\* HK comment: Users must know what properties there are to choose from.*

*We can love with this, but it would be nice to have a scrolable list\*\**

- Cross Properties (on this page) does not work yet.
- Implications don't yet either. *\*\* implication searches are not as useful as I thought they would be, but I can imagine you want to see if there are any implications with specific implication w.r.t. some properties \*\**

- Clicking on Armenian → Language page

## Language : Armenian (Western)

### Quick Analysis

Add Languages to compare with Armenian (Western)

Looking for a specific Language?

Selected Lings ( [Clean](#) )

Q, Compare Properties

Q, Similarity Tree

Overview	Description	Sureness Map	View on Map

← Previous **1** 2 3 4 Next →

Property	Value	Examples
<a href="#">AuxSel 01_Auxiliary Selection</a>	No	
<a href="#">03_VO</a>	Yes	
<a href="#">04_OV</a>	Yes	
<a href="#">14_Noun Adjective</a>	No	
<a href="#">05_SVO</a>	Yes	
<a href="#">06_SOV</a>	Yes	
<a href="#">07_VSO</a>	Yes	
<a href="#">08_VOS</a>	Yes	
<a href="#">09_OSV</a>	Yes	
<a href="#">10_OVS</a>	Yes	
<a href="#">15_Numeral Noun</a>	Yes	
<a href="#">16_Noun Numeral</a>	No	
<a href="#">17_Demonstrative Noun</a>	Yes	

- Quick analysis
  - Add Languages to compare with Armenian (Western)
    - *Works well* for 9 languages. The table copies and paste well in excel.
      - No download yet, nor save search/ history.
    - **We should remove latlong and Isocode from the compare search, and implication searches.**
  - Similarity Tree works well on this page (no download on this page yet)

Advanced search:

Universal Implication

Works, but we should remove latlong and isocode. These are useless (and yield pages and pages).

## Universal Implication Double      Both

- **Yields a problem: this should not exist.** (does not show up with universal implication both)

05\_SVO Yes 05\_SVO Yes [1](#) (dholuo)

Download: perfect.

**Saving: done: but I cannot find the saved file.**

-----  
***Signed in as expert man (will continue wednesday)***

**Supported edit is here!**

*I can delete entire languages (george test language is gone : that is too easy! )*

***Wanted:*** *only administrators have a delete button visible, and even they should be asked: whether they are sure.*

*Deleting an entire language: we should have safeguards build in: it should be complicated.*

*Only the administrator should be able to do this.*

*Deleting a property: we should have safeguards build in: it should be complicated. Only an administrator should see this button.*

**Test in blue box: How sure are you about the value set?**

*Change to:*

To save this value you must indicate *how sure are about the value?*

\*\*\*Where is the save button? \*\*

Or perhaps:

Please indicate how sure you are about the value

The three boxes

Then have a visible save button. If people try to save without indicating how certain they are:

*Pop up: you must indicate how certain you are.*

**\*\*\*\*\*Values**

For SSWL: I only want the administrator to set which values are available: yes/ no and sometimes yes/no/ NA.

Experts cannot have control over this. \*\*\*\*\*

\*\*I tried to set a value for a property in expertmantese but failed:  
I don't think the value saves, even if I say I am certain. \*\*

So, I am stopping here for the moment: I cannot seem to save values, nor add examples.
