Object : Application for a three -month internship at **New York university**

Dear Mr SHASHA

I am writing concerning any position of Mathematics Analyst in New York University. I heard that you have already offered an internship to my both colleagues Wang and El Hachfa who are with me in class, in fact they spoke to me about you, that why I am very much interested in an intern with you because it would offer an ideal opportunity to improve my knowledge of the profession and to practise my english.

As an Engineering Mathematics major at **INSA ROUEN** (National Institute of Applied Sciences), I have taken a variety of courses preparing me for a career in Mathematics and Information technology. Currently in the first year on an engineering cycle, I am learning many programming languages such as C and fortran and Java, which will help me to work efficiently on projects both in pairs and team.

In Mathematics, I have studied differential equation and numerical analysis... I also took several scientific calculation courses in the last 2 years at the University of Orléans in many applications such as Matlab, Scilab, R.

I have supplemented my education with a variety of summer jobs. Thanks to these experiences, I have been able to express my creativity and enhance my communication skills.

I enjoy talking with people and have extensive experience with foreign languages. In both academics and employment, I am self-motivated and dedicated. I work not only until the job is done, but also until it is well done.

I can be available From june 15, 2014 like the girls,

If you need further information, or if you have any questions, please feel free to contact me at ilyas,mounaime@insa-rouen.fr.

I really hope you will take my application into consideration and look forward to hearing from you soon.

Yours faithfully

MOUNAIME
