June 16, 2006

To Whom It May Concern,

During the visit of Peppe La Rosa which was between March 13, 2006 and June 9, 2006, he and I have been working on geometrically sensitive subgraph matching algorithms. These have applications in chemistry and protein interaction applications. He has been extremely motivated, has overcome language difficulties to understand and ask intelligent questions about specifications, and has written well-documented and well-structured code.

Best Regards,

Dennis Shasha
