NYU Women in Computing

Mentoring Program (with CS faculty)
We have established a mentoring program, in correlation with the CS faculty, for those who are seeking a mentor. The distinguished faculty of the Computer Science department are looking to support you in the areas of academia, research, career counseling, and anything else of benefit. This program has just launched, and we are accepting requests from interested students!

Outreach
One of WinC’s missions is to encourage future generations to join the technological field. We hope to be able to plan an Outreach program at local grade schools in order to promote the Computer Science/Technology track. Still a goal in progress, WinC will keep everyone updated on our headway.

Sponsorship
WinC will be working to find companies/organizations to sponsor us. That way, WinC can continually plan exciting and innovative events for our members.

Internship Positions
As your WinC officers, we are trying our very best to be a valuable resource for you, professionally and academically. Therefore, two of our goals are to be able to secure intern/summer positions for WinC members at a few firms in New York.

Recruiting Panel
WinC is teaming up with the ACM to create a well-advertised, highly anticipated event. With our contacts in all the major firms, corporations, and tech labs, we’re trying to make this our spring blowout event. Scheduled for the first week of February.

Events 2006 - 2007
SWE / WISE
WinC is working towards creating branch affiliate groups of Society of Women in Engineering (SWE) and Women in Science and Engineering (WISE). In their burgeoning state, these groups will be under the sponsorship and management of WinC. We hope to form allied committees that can work towards making these projects into a separate but unified coalition.

"Innovation in Computing" Event
We're planning to set up an event that will showcase innovative computing technologies, ideas and projects. This is going to be, hopefully, similar to the magnitude of our recruiting panel as a highly advertised/anticipated event which will take place towards the end of the spring semester. We hope to extend this invitation to high school students as well.

Contact Database
We will be building a contact database where WinC members will have exclusive access to a list of general corporate and professional contacts. By networking at each WinC event, and by including mentor contacts as well, we hope to make this into a valuable source for all those looking for job opportunities.
